

OUR PRAYER FOR A ONE HEART WORLD

*In a **One Heart World**, humanity lives a W(holy) Beings.*

We see W(holy) Beings believing in the ocean of unlimited human potential,

Opening their hearts as they inhale the Holiness of life by honoring all life and its mysteries with reverence for each other,

Undressing the layers of false identity and celebrating the birth of themselves into a new skin,

Creating a daily practice to listen to the wisdom of their inner intelligence guiding how they relate and contribute to themselves, the world, and the universe,

Self-actualizing their best performance in the living documentary of life every day,

Caring that all beings are loved, sheltered, nourished, educated, and healthy on all levels: mind, body, emotion, and spirit,

Living as One Family with equal status and dignity granted to all children, women and men around the globe,

Acting responsibly as One Family with the usage and replenishment of our earth's resources,

Supporting conscious capitalism to create a footprint for the melding of the ancient future for a green collar generation including: capping carbon output, using alternative energy technology and clean tech innovation, funding research, development, and programs to provide education and medical care globally, standardizing an integrative medical model, living a greener existence, building sustainable schools and communities, and supporting organic and biodynamic farming,

Contributing to world peace by gaining their own inner peace knowing the wholistic impact on the Oneness of all beings, the earth, and the universe,

Sharing the wealth of who they are by having the courage and willingness to devote themselves, body and soul, to make a difference any way they can,

Living in gratitude at the stem cell level,

Having the knowing that there is something bigger than they are,

*We see all hearts, and the heart of every cell, connected in **One Heart** speaking the **One Language** of all time...Love.*

Amen.
